- Important fixes.

and many more great new enhancements and features, [more details](#).

Do you know? We are developing a new tools and web parts to be provided for free to our clients.

Create Anonymous Forms in SharePoint on premise using SPARK Forms Builder

See how you can create public forms to be accessed by anonymous users outside your SharePoint farm and intranet environment and integrate them with your SharePoint on premise's lists and libraries using **SPARK Forms Builder**. You can design forms, enable them to be accessed by external anonymous users without the need to create any guest users or setup special environments to able to do that. You will be able to publish these forms links on your public web site or embed them in its public pages and have all data submitted by the anonymous users stored and managed in your farm without the need to write a single line of code. You will be able to view stored data for anonymous users as well. Build a complete hybrid intranet-internet environment for your customers and users in a couple of minutes.

Note: Requires a separate license to run.

Tabular Forms Feature is Available now! Creating a Tabular Form Using SPARK Forms Builder

SPARK Forms tabular designer is another way to design your forms using table-based form structure where each control can be dragged from the controls' toolbox and dropped into a cell. The control's size cannot exceed the cell's size; you can merge/split cells to control its width size using the cell actions menu at the right to of each cell presented by three dots [...] or you can control all table rows sizes by clicking on the View Style [Edit] button in the form's properties. The main benefit of having a tabular form is that you can hide/show entire rows and sections and having that area shifted up or down to fill the gap in the form without the need to write any line of code or to create a special design in the form to do that.

New! The Magnificent DataTable Control!

A new great control is now available in this release.

The **DataTable control** is a control that can contain a set of other controls, allowing table-based display for the information. This control main target is to connect with other list with a couple of steps and be able to retrieve and save data to that list as a master-child method and relationship.

	Title	Sale Value	Tax	Discount
☐	--			
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##
☐	-- ##data##	##data##	##data##	##data##

This control enables users to export its data as PDF, CSV, Word and excel files, print it out and do many other operations on a rows-based level.

A new way of designing your forms using SPARK Forms Builder!

SPARK Forms Builder now supports creating and designing Tabular Forms.

SPARK Forms Tabular Designer is another way to design your forms using table-based form structure where each control can be dragged from the controls' toolbox and dropped into a cell. The control's size cannot exceed the cell's size; you can merge/split cells to control its width size using the cell actions menu at the right to of each cell presented by three dots [...] or you can control all table rows sizes by clicking on the View Style [Edit] button in the form's properties.

When you create a form for your list/library for the first time, you can choose whether to create the form through the **Free Designer** or the **Tabular Designer**.

We are still offering big discounts for non-profit organizations worldwide, if your organization is a governmental, educational, humanitarian, voluntary, community or charitable then your organization is entitled to have a discount for over than 30%.
